Description

Chemical agent for disinfection and algae control. To be used for drinking water or swimming pool water (bathing water). **SANIT HypoChlor Desinfectant** separates chlorine, which kills bacteria, inactivates viruses and destroys algae.

Characteristics:

- Very effective disinfectant and algae control chemical
- Kills bacteria
- Destroys viruses and algae
- Has a broad spectrum of activity

Application Fields

- For disinfection of new drinking water systems
- For optimal hygiene of swimming/ bathing water

Application

Use 3 – 7 ml of **SANIT HypoChlor Desinfectant** for m³ of drinking or bathing water. In case of completely algae-infested swimming pools the dosage can be increased up to 20 ml per m³ of water.

Has bleaching effect on colourants.

Best before

- 12 months

Store **SANIT HypoChlor Desinfectant** in a cool place. Keep the canister always closed. Keep away from sunshine.
