

Weld Protection Spray

Description

Prevents adhesion of welding beads on the workpiece and the torch without impairing the weld. Increases the service life of the welding nozzles and the inner components of the torch. Does not contain silicone or CFCs.

Properties

- prevents adhesion of welding beads on the workpiece and the torch
- does not contain CFCs
- silicone-free
- suitable for steel, aluminum and stainless steel
- increases service life

Technical data

Color / appearance	white
Form	liquid, aerosol
Propellant	propane, butane
Base	talc
Solubility in water	insoluble
Odor	characteristic
Flash point	-60 °C

Areas of application

Used for all welding work on steel, aluminium and stainless steel.

Comment

Shake can regularly before extensive use. After use, clear spray nozzle (hold can with spray head upside down) by spraying until only pure propellant emerges.

Application

Briefly shake aerosol can. Switch off the welding equipment and spray a thin coat on cold workpieces and torches.

Note: Do not spray onto workpieces or parts of the torch while still hot or glowing! Allow an airing time of at least 5 minutes.

Available pack sizes

500 ml Can aerosol 4086
D-GB-E-P
