Description

- Prevents corrosion of zinc-plated steel pipes
- Protects already affected steel piping
- Creates protection film at minimum carbonate hardness of >2°d
- Protection film building within app. 1 year
- Stabilizes limestone in water

Application fields

- Chemical agent for treatment of soft up to medium-hard corrosive cold, warm, drinking and process water

Application

Dose the agent directly from the original packing using a dosing device. The quantity to be added amounts to 100 ml of **SANIT aquaris® ME** per 1 m³ of water. This corresponds to 4,0 mg of phosphate as P205 per 1 litre of water. 20 litres of **SANIT aquaris® ME** will be enough for app. 200 m³ of water. **SANIT aquaris® ME** is approved for treatment of drinking water (in case of adding not more than 5 mg/l P205) according to Drinking Water Regulation and Food Law. The chemical agent corresponds to the ordinance regulating the use of drinking water addition agents.

Best before

- not relevant
